Disclosures

Ken Saffier, MD, and Natasha Pinto, MD, have no financial interest or relationship with the manufacturer of any commercial product discussed in this presentation.

Plan for this noon conference:

- ▣ Join us as we simulate a buprenorphine treatment group.
- ▣ We often have new patients interested in whether this treatment is right for them.
 - Please role-play a patient who has an addiction to an opioid(s): e.g., oxycodone (OxyContin, Percocet), Heroin, hydrocodone (Norco, Vicodin), hydromorphone (Dilaudid), etc.
 - We'd like to answer your questions.
 - If you are loaded (role-playing, of course), you may participate by listening but please don't say anything.

Thanks:

- ▣ To our patients (real and simulated).
- ▣ For your interest in drug abuse treatment.
- ▣ For your referrals.
- ▣ For filling out your evaluations.
- ▣ For filling out your Commitment to Act form.
